

K4Community Smart Home

K4Community Smart Home is an all-in-one solution designed to bring smart technology to senior living communities. With easy-to-use automation and centralized control, residents and staff benefit from improved comfort, security, and efficiency.

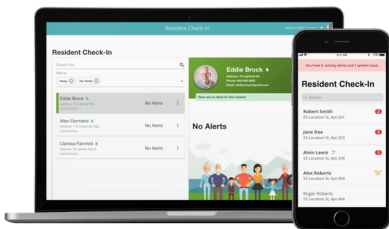

Dignified Senior Living

- **Intuitive Controls:** Accessible via the K4Community Plus app, Amazon Alexa voice commands, or remote controls, the system is easy to use and supports resident independence.
- **Seamless Integration:** Integrated devices work quietly in the background to provide a comfortable and safe living experience.

Comfort & Control

- **Lighting:** Automatically adjusts to enhance visibility and prevent falls, especially for nighttime movements.
- **Temperature:** Pre-sets to optimal levels for comfort and health during the day or night.
- **Customizable Settings:** Residents can personalize their space with Smart Home Scenes Creator, ensuring comfort and safety, while 'Away Mode' helps conserve energy.

Staff Awareness & Efficiency

- **K4Community Resident Check-In:** Automated via Smart Home devices and Amazon Alexa, ensuring seamless check-ins with timely staff alerts for enhanced safety and response.
- **Mobile Compatibility:** Keeps staff informed, ensuring continuous care with two daily check-in windows for better resident visibility.
- **Energy Data Insights:** Helps staff detect usage outliers for proactive maintenance, savings, and resident satisfaction.

All Powered By FusionOS

FusionOS is a patented integration and data coordination platform that solves data interoperability challenges by sharing the who, what, and when of your community two-ways and between every integrated system. FusionOS comes fully integrated with K4Community and over 50 trusted applications, systems, services, and devices.
